Subject Index for Volume 14

Acetaminophen
decomposition of (abst) 724
Acetazolamide
effect on bicarbonate in renal cortex (abst) 740
effect on CO_2 reabsorption (abst) 753
Acid-base parameters, urinary
effect of lysine on 215
Acid excretion
role of diet and species (abst) 776
Acidosis, renal
ammonia excretion in . . . . . 50, (abst) 293, (abst) 738
anion gap in (abst), ... 651
and growth in nonuremic children 349
hydrogen ion activity in (abst) 765
metabolite changes during (abst) 746
mineralocorticoid deficiency and . . . . . 466, (abst) 783
potassium and phosphorus responses to (abst) . . . 773
tubular, type 4, in children (abst) 769
urine acidification and (abst) 295
zinc and calcium excretion in (abst) 738
Actinomycin D
ammonia excretion and glutaminase affected by, in acidosis 50
Adenosine triphophatase
and chloride transport (abst) 752
Adenylcyclase cyclic AMP
role in renin release (abst) 296
Adrenergic nerves, renal
effect of acetylcholine and dopamine on (abst) . . . 776
receptors, beta type, maturation of (abst) 770
Albumin
after saline loading in neonatal piglets (abst) 772
isoelectric point of (abst) 731
Aldosterone
in chronic parenchymal renal failure (abst) 694
in chronic renal failure, role in sodium excretion . 228
in essential hypertension, age vs. urinary sodium . 619
Alkalosis
adaptive response to, in turtle bladder (abst) 754
anion gap in (abst) 741
arterial acetate and (abst) 761
contraction *a.*, generation and 24-hr followup of . . 557
effect of chronic hypotonic expansion on (abst) . . 752
hyponatremia in (abst) 647
Alloxan
effect on water and sodium transport (abst) 740
Alport's syndrome
macular changes in (abst) 203
urinary protein in (abst) 736
Alport's theme
new syndrome (abst) 645
Aluminum
and PTH effect on renal function (abst) 742
Amiloride
tubular acidosis and (abst) 762
Amino acids
in children with uremia 323, 340
in coated charcoal hemoperfusion in uremia 74
hydroxy analogues of (abst) 738
in toad bladder epithelium (abst) 744
transport in isolated tubule (abst) 739, 740
Aminonucleosides
and glomerular epithelial cells 21
Aminooxyacetate
effect on glutamate deamination and ammonia formation (abst) 744
Ammonia
control of production of, in urinary epithelium (abst) 743
ethacrynic acid in production of (abst) 742
excretion of, and glutaminase, in acidosis 50
synthesis of, in absence of blood glutamine (abst) . 736
Amphotericin B
nephrotoxicity from, effects of mannitol on (abst) . 732
Anemia
androgen therapy for (abst) 109
Anesthetics
and renal response to ischemia (abst) 724
Angiography, renal
β_2-microglobulinuria after (abst) 653
Angiotensin, *see also* Renin-angiotensin
in acute renal failure 576
and aldosterone production (abst) 699
effect on PRA and aldosterone in neonates (abst) . 703
and free water formation (abst) 697
in postobstructed rat kidney (abst) 735
in situ effects of (abst) 758
saralasin effect on (abst) 703
Analgesic nephropathy
in Nottingham (abst) 292
Antibody studies
of glomerular basement membrane (abst) 707
of influenza vaccination in chronic renal failure . . 614
of glomerulonephritis 594
in urinary tract infections 607
Antigen, *see* Immunology
Antidiuretic hormone
hydrosmotic response to (abst) 763
and intramembranous particle aggregation (abst) . 765
in metabolism and transport of toad bladders (abst) 745
PTH and (abst) 642
Antidiuretic therapy
and renin activity, in essential hypertension (abst). 705
Antihypertensive therapy
hemodynamic and hormonal effects of (abst) 702
Antimony pH electrodes
manufacture and use of 126
Antitubular basement membrane antibodies
detection of 594

Arachidonic acid
renal vasodilating action of (abst) 757
Arteriovenous fistula
electrolyte excretion after (abst) 763
Ascites, refractory
in cirrhosis 93

Bacteria
antibody-coated *b.*, in urinary tract infections . . . 607
Behçet's disease
pathologic and immunofluorscent findings in (abst) 542
Behçet's syndrome
with interstitial nephritis and renal failure (abst) . . 668
Benzolamide
effect on proximal tubular pH and P_{CO_2} (abst) . . . 756
Bicarbonate
in contraction alkalosis 557
effect on extracellular buffering of exogenous acid (abst) 757
effect of lysine on excretion of 215
Bile duct ligation
pathophysiologic responses to (abst) 722
and urine concentrating ability (abst) 784
Blood pressure
effect on lumen volume and reabsorption in loop of Henle 255
Bone marrow transplantation
radiation nephritis following (abst) 713
Brush border membrane
cation effects on sodium transport in vesicles of (abst) 766
defect in, study of X-linked hypophosphatemic male mouse 236
glycerol to preserve transport function of 279

Calcium
in uremia, action with phosphorus and PTH 207
voltage dependence in Henle's loop (abst) 636
Calcium urolithiasis, idiopathic
inhibitors of calcium crystal growth in (abst) 663
Calciuria
PTH and vit. D in (abst) 635
Captopril
effect on renal function (abst) 693
Carbon dioxide
equilibria in the kidney 395
Carbonic anhydrase
in brush border (abst) 779
Catecholamines
in essential hypertension, age vs. urinary sodium . 619
sodium intake effect on release of (abst) 692
Catheters, indwelling
Antibody coating of urinary bacteria from (abst) . 651
Cell growth
and potassium depletion nephropathy (abst) 745
Children
with kidney disease, growth and development study 299–382
Chloride transport
effect of vasoactive intestinal peptide and somatostatin (abst) 782
gradients in loop of Henle 428
and oxygen consumption (abst) 745
and potassium depletion 414
and PGE_2 (abst) 782
Cholesterol
in renal disease (abst) 658
Cirrhosis
prostaglandin E in (abst) 665
refractory ascites in 93
Cis-dichlorodiamine platinum, *see* Dichlorodiamine platinum
Clonidine therapy
in acute renal failure (abst) 733
baroreflex function and (abst) 693
diuretic activity of (abst) 778
renal blood flow changes with (abst) 704
and sympathetic nervous system activity (abst) . . 648
Cloning
of glomerular epithelial cells 21
Coagulation studies
and effect of hemoperfusion in uremia 74
Collecting duct system
acetazolamide and hydrogen ion secretion in (abst) 778
and ADH, effect of aldosterone (abst) 780
calcium and magnesium transport in (abst) 749
hydrogen ion secretion (abst) 777
potassium adaptation in (abst) 780
potassium metabolism effect on morphology of (abst) 764
Connective tissue disease
nephrotic syndrome and 530
Cortex, renal
oxyanion ATPase activity in (abst) 780
and transport of tetraethylammonium and *N*-methylnicotinamide (abst) 737
Corticosteroid therapy
effect in NZB/NZW mice 151
Co-trimoxazole therapy
mutant bacteria and (abst) 294
Culture
of glomerular epithelial c[illegible] 21
Cyclic adenosine monopho[illegible]
after volume expansion during vena cava constriction (abst) 759
Cyclic nucleotide phosphodiesterases
in glomeruli 444
Cyclooxygenase
in renal drug metabolism (abst) 739
Cystine stones
side effects of alfa-mercaptopropionyl-glycine (abst) 203
Cystine transport
in renal tubules (abst) 739
Cytoskeletal system
role in vasopression and cAMP changes in toad bladder epithelium (abst) 767

Diabetes
cAMP phosphodiesterase activity in (abst) 743
glomerular dynamics in (abst) 725
hemodialysis vs. peritoneal dialysis for *d.* nephropathy (abst) 109
islet transplantation for (abst) 707
ketoacidosis of, respiratory failure in (abst) 656
ketosis of, hyperchloremic acidosis in (abst) 657

Diabetes (*cont'd*)
lysosomal enzyme activity in (abst) 743
and nondiabetic renal disease (abst) 660
PTH and creatinine in uremia of (abst) 635
renin role in vascular lesions of (abst) 699
therapeutic renal embolization for (abst) 654
N,N[1]-Diacetylbenzidine
to induce nephropathy (abst) 720
Dialysate
flow rate and solute clearance in, in peritoneal dialysis 486
stable single 25:1 concentrate of bicarbonate in (abst) 677
Dialysis
for acute renal failure, nitrogen balance during (abst) 687
albumin metabolism in (abst) 670
and aluminum (abst) 682
arterial hypoxemia and (abst) 689
ascites and (abst) 685
cardiovascular effects of sodium bicarbonate and sodium acetate in (abst) 678
for chronic renal failure, cost by treatment at home (abst) 689
cost effective therapy with, for uremia (abst) 680
and cyclic AMP reduction (abst) 671
EEG, VER, and photic driving responses in (abst) . 676
effect on red cell 2,3-DPG and P50 (abst) 674
in elderly (abst) 296
and erythropoietin (abst) 672
extracorporeal access to intracellular solutes of whole blood (abst) 676
femoral vein catheterization for (abst) 686
hemodialysis
adequacy tests (abst) 674
angiotensin converting enzyme during (abst) . . 683
atherosclerosis in (abst) 689
bicarbonate repletion in (abst) 681
blood pressure and vasoactive hormones during, effect of bath composition (abst) 690
cardiac arrhythmias and (abst) 681
cardiac function changes during (abst) 679
in children, acid-base changes and acetate in (abst) 677
chronic *h.*, and cardiomyopathy diagnosis (abst) 672
chronic *h.*, clotting problems in (abst) 684
chronic *h.*, effect on serum and tissue calcium and trace elements (abst) 638
chronic *h.*, gastric acid secretion in (abst) 201
chronic *h.*, high-protein intake and (abst) 296
chronic *h.*, iron overload in (abst) 673
chronic *h.*, myocardial function in (abst) 689
chronic *h.*, residual renal function and length of (abst) 296
and effect of diet on plasma triglycerides 180
effect of glucose on acetate-1-^{14}C in (abst) 673
and exercise, myocardial response to (abst) . . . 684
and hepatitis (abst) 669, 681
high attitude blood-gas study on (abst) 678
hyperthyroidism in, and heparin (abst) 675
hypotension control in (abst) 672
influenza vaccination and (abst) 671
intracellular fluid shifts in (abst) 678
leukocyte chemiluminescence during (abst) . . . 690
leukopenia and (abst) 677
leukopenia and hypoxemia with (abst) 674
maintenance *h.*, amantadine hydrochloride in (abst) 687
maintenance *h.*, hepatic iron stores in (abst) . . . 688
maintenance *h.*, lipid changes in (abst) 688
malnutrition and (abst) 683
membranes in, effect on leukopenia and activation of complement (abst) 103
oliguric and nonoliguric acute renal failure and (abst) 680
and oral charcoal for idiopathic pruritus 682
osteodystrophy of 68
potassium removal by (abst) 686
and pregnancy (abst) 679
and psoriasis (abst) 682
pyrogenic reactions and dialyzing membrane (abst) 670
sex hormone changes in (abst) 112
sickle crisis induced by (abst) 686
β-thromboglobulin in (abst) 684
training at home (abst) 673
and transplantation, e antigen and hepatitis (abst) 103
vs. hemofiltration (abst) 669
vs. hemoperfusion, in uremia 74
vs. postdilution hemofiltration (abst) 103
vs. ultrafiltration (abst) 676
vit. A and (abst) 675
without heparin (abst) 112
heparin and (abst) 688, 690
hepatitis B, and passive immunization against (abst) 104
hepatitis B, home vs. center (abst) 672
hypoxemia in (abst) 681
hypovolemic hypotension during, hourly plasma refilling rate (abst) 110
minimum *d.*, residual renal function and (abst) . . . 685
nitrogen balance during, in uremia 491
nutritional blood flow to limbs after access procedures in (abst) 111
peritoneal
alternating hyper-hypoosmolal solutions (abst) . 679
cefazolin clearance in (abst) 674
in diabetics vs. uremics, clearance study (abst) . 671
intermittent vs. continuous (abst) 110
recirculating, regenerating, continuous flow in (abst) 680
solute clearance in 486
thickened peritoneal membrane in (abst) 675
total body potassium and (abst) 683
use of sorbents (abst) 108
in primitive recreation areas (abst) 687
for psoriasis (abst) 104
renal cystic degeneration and (abst) 669
self care concept (abst) 676
sequential ultrafiltration and diffusion dialysis study (abst) 685
and spermidine, spermine, and putrescine in renal failure (abst) 688
splanchnic vasodilators effects in (abst) 675

Dialysis (*cont'd*)
transcompartmental fluid shifts, ultrafiltration vs. diffusion (abst) 677
Dialysis dementia
and aluminum (abst) 671
in psychotic patients, reset osmostat and hyponatremia in (abst) 653
review of, in VA hospital (abst) 680
Dialysis disequilibrium syndrome
prevention with glycerol . . . . . 270, 683 (abst)
Dialysis encephalopathy
aluminum and clonazepam effects on (abst) 670
aluminum studies in (abst) 105
diagnostic criteria and epidemiology of (abst) . . . 670
Dialyzers
blood gas changes and (abst) 682
Cis-dichlorodiamine platinum
action of (abst) 728
renal effects of (abst) 733
Diet
effect on triglycerides in hemodialysis patients . . . 180
energy intake in children with kidney disease . . . 313
in uremic children 306
Diuretics
in ascites of cirrhosis 93
effect on distal tubule transport (abst) 762
renal tubular effects of piretanide (abst) 785
vandate as (abst) 760
Dopamine
renal actions of (abst) 542
Dopaminergic blocking agents
effect on natriuresis (abst) 755

Electrical studies
in loop of Henle 428
of rabbit collecting tubule 585
Electrolytes
effect of lysine on excretion of 215
transport in turtle bladder (abst) 635
Endocrine pressor factors
in essential hypertension 619
Endoplasmic reticulum
role as transcellular route (abst) 736
Endotoxin tolerance
and glycerol (abst) 720
End-stage kidney disease
immunoglobulin-A deposits in (abst) 659
Enzyme activity
in glomeruli 444
Epithelium
aggregated intramembranous particles from (abst) . 771
"leaky" epithelium (abst) 784
ouabain binding to (abst) 770
papillary *e*, hydration studies of (abst) 786
Erythropoiesis stimulating factor
intrarenal pH effect on (abst) 759
Erythropoietin
and anemia of uremia (abst) 734
beta adrenergic activity and (abst) 764
Extracellular water
and generation of alkalosis 557

Fabry's disease
in blacks (abst) 666
Fatty acids
in lactate and pyruvate metabolism 567
Furosemide
effects of acidosis on (abst) 640
and loop of Henle transport functions (abst) 642

Genetics
of interstitial Fc receptors (abst) 712
Gentamicin
and antidiuretic hormone (abst) 733
nephrotoxicity of, in neonate (abst) 648
and nonoliguric acute renal failure (abst) 721
renal handling of (abst) 726, 728, 772, 773
Glomerulonephritis
antitubular basement membrane antibodies in . . . 594
chronic *g*., immune complex detection in (abst) . . 202
cytomegalovirus *g*., experimental model of (abst) . 719
extracapillary proliferative *g*., various courses of (abst) 664
genetic study of (abst) 708
glomerular cell turnover in (abst) 719
HB_sAg immune complex and (abst.) 107
idiopathic crescentic *g*., relapse in (abst) 667
immune complex *g*.
antibody deposition in (abst) 717
factors in subepithelial immune deposits in (abst) 709
immunology of (abst) 709
kidney antigens in (abst) 708, 714
PGE, therapy for (abst) 713
pulmonary hemorrhage in (abst) 655
membranoproliferative *g*.
and Castleman's pseudotumor (abst) 201
in children, immunology of (abst) 709
electron microscopy of (abst) 710
immunology of (abst) 706
malabsorption and diabetes with (abst) 651
in multiple myeloma (abst) 659
platelet inhibitor drugs in (abst) 649
membranous *g*.
evolutionary phases of 511
malignant tumors in (abst) 542, 711
stronglyloides stercoralis infection and (abst) . . 707
mesangial IgA *g*., in HLA identical brothers (abst). 203
methylprednisolone pulses in (abst) 660
necrotizing *g*., systemic vasculitis presenting as (abst) 649
in New Zealand white mice (abst) 714
poststreptococcal *g*., immunology of 501, 719
predicting prognosis of, comparison of methods (abst) 653
proliferative lupus *g*., clinical occurrence of (abst). 649
rapidly progressive *g*., plasmapheresis and immunosuppressive therapy for (abst) 646
warfarin and dipyridamole therapy and (abst) . . . 668
Glomerulosclerosis, focal
and pregnancy (abst) 664
and reflux nephropathy (abst) 666
Glomerulatubular balance
mathematical analysis of (abst) 749
Glomerulus
basement membrane, altered, immunology of . . . 710
basement membrane, anionic sites in (abst) 713
blood flow, in transplantation 1

Glomerulus (*cont'd*)
capillary hydrostatic pressure of (abst) 768
capillary, model of charge selectivity (abst) 755
capillary surface area, in normal and hypertrophic kidneys 437
cloning cells of (abst) 716
dynamics, network theory and (abst) 774
effect of serotonin on cyclic nucleotides in (abst) . . 781
epithelial cells of, isolation and characterization of . 21
enzyme activity in 444
filtration of macromolecules (abst) 751
filtration rate, predicted by serum β_2-microglobulin and creatinine (abst) 662
in ischemia and repair of proximal tubule 31
isolation of polyanion in (abst) 715
permeability of macromolecules (abst) 775
permeability to endogenous proteins (abst) 708
in transplantation failure 10
visceral epithelial cell phagocytosis of 526
Glucocorticoid
and growth in children with uremia 330, 365
deficiency of, renal water excretion and (abst) 767, 771
Glucocorticoid steroid therapy
and renal acid-base equilibrium (abst) 763
Glucose
determination in tubular fluid, fluorometric method 191
in pyruvate and lactate metabolism 567
transport of, in subthreshold glucose loading and volume expansion (abst) 746
Glutaminase
and ammonia excretion in acidosis 50
Glutamine
accumulation and reabsorption in nephron 406
Glycerol
to preserve brush border membrane transport function 279
to prevent dialysis disequilibrium syndrome 270
Goodpastures syndrome
immunology of (abst) 718
treatment of (abst) 650
with infectious mononucleosis and tear gas (abst) . 644
Griseofulvin
effects of (abst) 772
Growth
and development in children with kidney disease 299–382
Growth hormone
in uremic children 317
Guanabenz
vs. placebo (abst) 705
Guanidino acids
in uremia (abst) 722
Guanine nucleotides
effect on osmotic water flow of toad bladder (abst) . 769

Hematuria syndrome
complement defect in (abst) 295
Hemodialysis, *see* Dialysis
Hemodynamics, renal
in respiratory failure 58
Hemolytic uremic syndrome
hemodialysis and exchange transfusion for (abst) . 661

Hemoperfusion
charcoal *h.*, digitoxin extraction by (abst) 687
coated charcoal *h.*, solute, amino acid, and hormone changes in uremia 74
for drug intoxication (abst) 686
effect on digitoxin action (abst) 685
ethchlorvynol intoxication and (abst) 690
and secondary hyperparathyroidism (abst) 111
and sorbent regeneration of ultrafiltrate, for end-stage renal disease (abst) 111
thyroid function in (abst) 111
Hepatic lipoprotein secretion
in puromycin aminonucleoside nephrosis (abst) . . 742
Hepatorenal syndrome
and ascites of cirrhosis 93
Heroin nephropathy
study of (abst) 649
Histology
of membranous glomerulonephritis 511
HLA-identical siblings
and transplant rejection 283
Hormones
changes, in coated charcoal hemoperfusion in uremia 74
in nephron transport processes 547
Hydraulic conductance
of proximal convoluted tubule 263
Hydrocortisone sodium succinate
effects of long-term use in rats 151
Hydrogen ion activity
ATPase and (abst) 755
and antimony pH electrodes 126
and carbon dioxide equilibria in the kidney 395
intracellular, changes in renal cortex (abst) 765
pyruvate and glucose metabolism in (abst) 780
Hydrosmotic response
to serosal hypertonicity, cationic requirements (abst) 761
Hydrostatic pressure
effect on ADH-stimulated bladders (abst) 778
Hypercalcemia
renal insufficiency and 194
Hypercalciuria
in dietary phosphorus deprivation (abst) 635
and familial renal tubular acidosis (abst) 653
Hypercapnia
renal function in 58
Hyperglycemia anuric
treatment of (abst) 666
Hyperkalemia
sodium polystyrene sulfonate in (abst) 726
Hyperlipoproteinemia
in chronic renal insufficiency 142
Hyperparathyroidism
β-adrenergic system in, after transplant (abst) . . . 641
total PTX with grafting of parathyroid tissue to treat (abst) 106
Hypertension
aldosterone secretion in (abst) 700
AII and sodium transport in (abst) 694
autoregulatory ability of contralateral kidney in Goldblatt rat (abst) 702
congenital mesoblastic nephroma and (abst) 691
essential *h.*

Hypertension (*cont'd*)
age vs. urinary sodium for judging renin, aldosterone, and catecholamine levels 619
clonidine in (abst) 692
thiazides and (abst) 657
furosemide and renin secretion in (abst) 695
furosemide effects in (abst) 701
glomerular filtration coefficient in salt loading (abst) 691
and hemodialysis, adrenergic and renin-angiotensin system in (abst) 704
and high-salt diet (abst) 695
immunology of (abst) 698
influence of posture and sodium balance, study of catecholamines in (abst) 692
kallikrein-kinin system in (abst) 697
partial nephrectomy-salt model of (abst) 699
postoperative blood pressure measurement and (abst) 696
prazosin and renal hemodynamics in (abst) 774
prostaglandins and renin-aldosterone system in (abst) 543
renal injury and proteinuria in (abst) 694 (2)
and renin (abst) 698, 700, 702
and renin, in SHR (abst) 691
renin-volume relationship in aortic coarctation (abst) 691
renovascular *h.*, medical vs. surgical therapy (abst) 705
saralasin effects in (abst) 103
sodium-retaining humoral agent in (abst) 704
thiazides in (abst) 700
urinary kallikrein activity in (abst) 701
Hyponatremia
study of (abst) 646
Hypophosphatemia, X-linked
renal transport of phosphate in 236
Hypoplasia
with nephron hypertrophy (abst) 543
Hypotension
in hemodialysis and hemofiltration (abst) 684
idiopathic orthostatic *h.*, prostaglandin synthesis and (abst) 668
Hypothyroidism
sodium and inulin space in (abst) 729
Hypoxemia
effect on renal water excretion (abst) 777
renal response to, in fetal lamb (abst) 776
Hypoxia
erythropoietin and renin production in (abst) 760
renal function and 58

Imidazole
effect on renal plasma flow and sodium excretion (abst) 776
Immunoglobulin A nephropathy
study of (abst) 654
Immunology
of acute poststreptococcal glomerulonephritis . . . 501
alternative complement pathway by low mol wt fraction (abst) 705
detection of antitubular basement membrane antibodies 594
of glomerular basement membrane (abst), . . 294, 295
of glomerular and tubular basement membranes (abst) 717
hemodynamics of immune complex trapping 452
HLA-identical sibling transplant rejection 283
immune complex assay (abst) 294
immune complex clearing from blood (abst) 712
immune complex trapping by kidney 452
of steroid responsive nephrotic syndrome (abst) . . 294
of tubulointerstitial disease (abst) 293
Immunosuppressive drug therapy
effect on offspring (abst) 108
Inappropriate secretion of antidiuretic hormone syndrome
after intracardiac pacemaker (abst) 661
in chronic schizophrenia (abst) 647
Indomethacin
effect on furosemide-induced renin release (abst) . 296
effect on salt and water homeostasis (abst) 751
Inflammatory reactions
in papilla vs. cortex (abst) 718
Influenza vaccination
antibody responses to, in chronic renal failure . . . 614
Insulin
effect of hemoperfusion on 74
effect on sodium excretion (abst) 744
and growth in uremic children 317
receptor in glomeruli (abst) 741
Interstitial nephritis
immunology of (abst) 715
Intramembranous particle aggregation
effect of hypertonicity and colchicine on (abst) . . 756
Inulin clearance
in newborns (abst) 662
Iron therapy
potential danger in hemodialysis (abst) 293
Ischemia
and repair, in proximal tubule 31
and transplantation failure 1, 10

Kidney disease
in children, growth and development 299–382
Kinin system, renal
and renal sodium excretion (abst) 766

Lactate
metabolism in isolated tubules of normal dog 567
Lactic acidosis
effect of sodium bicarbonate on (abst) 645
Lead poisoning
tubular dysfunction in (abst) 654
Legionnaire's disease
myoglobinuric renal failure in (abst) 730
Levamisole
effect on cutaneous response to DNCB (abst) . . . 295
LeVeen peritoneal-jugular shunt
in ascites of cirrhosis 93
Limb of Henle, descending
properties of, in rabbit (abst) 782
Lipid metabolism
in chronic renal insufficiency 142
Lipoid nephrosis, adult
therapy schedule for (abst) 202

Loop of Henle
electrical studies of 428
lumen volume and reabsorption in 255
Lowe's syndrome
polyamines, pyridoxal phosphate and (abst) 737
Lung carcinoma
glomerular bound immunoglobulins (abst) 716
Lupus nephritis
and pregnancy (abst) 665
serum immune complex levels and (abst) 659
Lysine
bicarbonaturic effect of 215

Magnesium
deficiency, skeletal resistance to PTH in (abst) . . 638
in phosphate depletion (abst) 636
Malnutrition
low GFR in (abst) 725
in uremic children 301
Mannitol
effect in acute renal failure 115
Medulla, renal
potassium recycling in (abst) 756
tissue compartments in papilla (abst) 779
stop flow studies of solute permeability in inner vesicles of (abst) 770
Membrane transport systems
and interaction of PAH and phlorizin in kidney . . 158
nature, localization, regulation of 547
Membranous nephropathy
complement activity in (abst) 717
immunology of (abst) 668
Micropuncture studies
fluorescent microprotein method for (abst) 777
Mineralocorticoid
deficiency of, and metabolic acidosis 466
effect on sodium excretion (abst) 753
Minimal change nephrotic syndrome
adrenal function in steroid therapy of (abst) 656
immunology of (abst) 706
renal failure in (abst) 656
Morphology
of proximal tubule in ischemia and repair 31
of rabbit collecting tubule 585
Multiple myeloma
Bence-Jones protein and (abst) 734
nephrotic syndrome in (abst) 710
typing of (abst) 712
Myeloma kidney
biopsy studies of (abst) 708

Nail patella
renal changes of, without onychoosteodysplasia (abst) 661
Natriuresis
after extracellular volume expansion, rabbit vs. rat (abst) 773
Natriuretic factor
characterization of (abst) 774
purification of (abst) 767
renal origin of (abst) 106
Natriuretic response
changes in renal medulla urea and sodium in (abst) 759
to extremes of sodium intake (abst) 775
Neoplasma
in hydrocortisone-sodium-succinate-treated rats . 151
Nephrectomy
contralateral *n.* changes in papilla after (abst) . . . 759
subtotal *n.*, and ammonia excretion in acidosis . . . 50
glomerular capillary surface area in normal and hypertrophic kidney 437
unilateral *n.*, mechanism of hemodynamic changes with (abst) 748
Nephritis
acute poststreptococcal *n.*, phagocyte adherence to glass in (abst) 717
familial *n.*, electron microscopy of glomeruli in (abst) 718
immune complex *n.*,
T-lymphocyte deficiency in (abst) 711
suppression of (abst) 712
immune complexes in (abst) 714, 716
nephrotoxic serum *n.*, origin of glomerular crescents in (abst) 292
spontaneous *n.*, immunology of (abst) 715
tubulointerstitial *n.*, immunology of (abst) 711
Nephrolithiasis
effect of diuretics on calcium in (abst) 655
recurrent *n.*, PTH in (abst) 640
Nephron
phosphate reabsorption in (abst) 773
in transplantation failure 10
transport processes in 547
Nephrosis, idiopathic
antibody study of (abst) 714
Nephrostomy
in ureteral obstruction secondary to advanced nonurologic malignancy (abst) 646
Nephrotic syndrome
clearance studies in (abst) 660
connective tissue disease and 530
familial Mediterranean fever and (abst) 105
idiopathic *n.s.*, in elderly (abst) 656
immunology of (abst) 718
macromolecule clearance studies in (abst) 647
renal sodium retention during volume expansion in 478
sodium retention mechanism in (abst) 203
steroid and thyroid hormone therapy for (abst) . . 662
Nerve deafness
and renal disease syndrome, described (abst) . . . 655
Nitrogen
in children with uremia 313
in dialysis therapy of uremia 491
Nitrosourea therapy
nephritis and renal failure due to (abst) 661
Nondiuretic rats
filtration pressure disequilibrium in (abst) 747
Noradrenalin
effect on lumen volume and reabsorption in loop of Henle 255
Norepinephrine
acute renal failure induced by, functional and histologic study 115
to induce acute renal failure, a reversible model . . 187
and prostaglandin synthesis (abst) 695

Norepinephrine (*cont'd*)
in uremic and normal platelets (abst) 728
Nutrition
factors in children with renal insufficiency 306

Obstruction, renal
retention function tests to determine (abst) 292
Osmosis, transepithelial
in proximal convoluted tubule 263
Osmotic gradient
effect on intramembranous particle aggregation and water permeability (abst) 756
Osteodystrophy, renal
in children 355
early detection and treatment of (abst) 638
of hemodialysis 68
parathyroidectomy with autotransplantation for (abst) 652
Osteolysis
idiopathic multicentric *o.*, nephropathy of (abst) . 706
Osteomalacia, uremic
vit. D_3 for (abst) 640
Oxalate
renal excretion of (abst) 766

Papillary necrosis
functional, enzymatic, morphologic study of (abst) 731
micropuncture study (abst) 775
Parathyroidectomy, subtotal
and uremia, osteomalacia after (abst) 204
Parathyroid hormone
acidosis and (abst) 637, 641
and aluminum excretion (abst) 643
and bicarbonate absorption by proximal tubules (abst) 639
effect of sodium intake on (abst) 641
effect on myoinositol metabolism and ion transport (abst) 741
effect on urinary diluting mechanism (abst) 644
and hypermagnesemia (abst) 644
in phosphaturia of hypercapnia (abst) 637
phosphaturic effect of (abst) 643
role of ammonia in phosphaturic effect of (abst) . . 639
in uremia, action with calcium and phosphorus . . 207
and vit. D metabolites in acute renal failure 245
Parenchymal disease, renal
mean arterial pressure in (abst) 648
Parenchymal infections
antibody-coated bacteria in 607
4-Pentenoic acid
in ammoniogenesis (abst) 742
Pentobarbital
effect on hematocrit, blood volume, and circulatory function (abst) 749
pH, *see* Hydrogen ion activity
Phagocytosis
of glomerular visceral epithelium 526
Phenylalanine metabolism
in uremia vs. normal 169
Pheochromocytoma
with hyperreninism (abst) 543

Phlorizin
and PAH uptake in kidney 158
Phosphate
depletion, distal acidification defect in (abst) 639
and pediatric renal allograft recipients (abst) 643
transport in cortical collecting tubule (abst) 642
transport in proximal convoluted tubules (abst) . . 641
transport in X-linked hypophosphatemic male mouse 236
Phosphorus
in uremia, action with calcium and PTH 207
Polycystic kidney disease
and corolis disease (abst) 666
glucocorticoid effects in newborn (abst) 709
oral-facial-digital syndrome (abst) 543
transmembrane movement of solutes in (abst) . . . 763
Potassium
deficiency of, effect on inner medullary plasma flow (abst) 767
homeostasis in rabbit (abst) 777
homeostasis, role of insulin and adrenal hormones in (abst) 750
and sodium intake (abst) 698
transport defect, and distal tubule chloride shunt (abst) 662
transport in frog kidney (abst) 783, 785
transport in transplantation failure 10
and tubular chloride transport 414
Prazosin hydrochloride
racial variation in response to (abst) 657
Pregnancy
postpartum renal insufficiency 383
sodium handling during (abst) 753
Prolactin
in renal disease (abst) 293
Propranolol
function and hemodynamics study of (abst) 774
as membrane probe (abst) 755
Prostacyclin
and regulation of salt and water excretion (abst) . . 760
Prostaglandin
and acetaminophen (abst) 747
calcium effect on synthesis of (abst) 786
desoxycorticosterone and (abst) 693
effect on hemorrhage (abst) 202
effect on renal hemodynamics and sodium reabsorption (abst) 770
in isolated rat glomeruli (abst) 739, 740
and renin during rest and exercise (abst) 786
renin release and (abst) 697
role in fetal kidney function and blood flow (abst) . 769
Prostaglandin D_2
natriuretic effect of (abst) 762
Prostaglandins E, urinary
radioimmunoassay for (abst) 201
Protamine
in proteinuria (abst) 727
Protein
cationic *p.*, effect in Necturus gallbladder (abst) . . 750
excretion, sodium maleate and sodium chromate effects on (abst) 731
intake
in children with kidney disease 313

Protein (*cont'd*)
renal function with (abst) 722
metabolism, in children with uremia 340
Protein kinase
ADH and calcitonin effect on (abst) 748
Proteinuria
protein selectivity for, uses and misuses (abst) . . . 650
Purine nucleotide cycle
during recovery from acid loading (abst) 737
Puromycin
and glomerular epithelial cells 21
Pyelonephritis
antibody-coated bacteria in 607
Pyruvate
formation in kidney cortex (abst) 746
metabolism in isolated tubules of normal dog 567

Red blood cells
effect on renal function in perfused kidney (abst) . . 750
Renal artery lesions
reconstruction for (abst) 703
Renal artery stenosis
prostaglandins and renin-angiotensin system in (abst) 702
Renal blood flow
effect of angiotensin and kimins on, in hypoperfused rat (abst) 765
in respiratory failure 58
Renal biopsy, percutaneous
angiographic control of (abst) 665
bleeding after, computerized tomography to assess (abst) 657
computerized tomography to diagnose complications of 87
Renal concentrating mechanism
new model of (abst) 751
Renal denervation, acute contralateral
renal response to (abst) 758
Renal failure
and absence of hydronephrosis (abst) 664
acute *r.f.*
after reduced renal mass, protection against (abst) 109
amino acids in (abst) 729, 730
brush border alterations in (abst) 727
endothelial cells in (abst) 721
functional and histologic features of pathogenesis of 115
glycerol rechallenge and saline loading in (abst) 735
and hemodynamics in transplantation 1
^{131}I-hippuran scan in (abst) 725
isolated nephron segments studied in (abst) . . . 761
i.v. pyelography for (abst) 203
multiple myeloma presenting as (abst) 646
muscle calcifications in (abst) 644
and nontraumatic rhabdomyolysis, prognosis (abst) 655
norepinephrine induced, a reversible model . . . 187
norephinephrine model of (abst) 721
pathogenic factor in (abst) 106
PGE_2 in (abst) 734
postischemic model of, and complement depletion (abst) 721
protective actions in (abst) 727
PTH and vit. D metabolites in 245
renin-angiotensin system in 576
in respiratory failure 58
sodium intake and renin-angiotensin system in (abst) 722
total parenteral nutrition in (abst) 650
toxic nonoliguric type, effect of continued toxin administration (abst) 730
with licorice ingestion (abst) 544
chronic *r.f.*
and acquired cystic disease (abst) 710
antibody responses to influenza vaccination in . 614
bicarbonate reabsorption in (abst) 104
bone loss stopped by vitamin D_3 (abst) 108
brain calcium in (abst) 747
calcitonin and bone disease in (abst) 104
creatinine metabolism in (abst) 729
diet effects on plasma triglycerides in 180
electrocoagulation of renal cortex and 82
gut hormone profile in (abst) 105
hearing loss in (abst) 663
hepatic effects in (abst) 732
lipids and (abst) 723
muscle abnormalities in (abst) 732
ovarian function in (abst) 679
pancreatic polypeptide in (abst) 737
pipemidic acid as extraurinary antibiotic in (abst) 202
pituitary function in (abst) 723
plasma amino acids in (abst) 735
plasma retinol in (abst) 204
role of aldosterone in sodium excretion 228
zinc deficiency in (abst) 728
cirrhosis and 93
end-stage *r.f.*
in children, serum creatinine to predict (abst) . . 659
hematocrit and serum-erythropoietin in (abst) . 105
plasma potassium and saralasin in (abst) 698
vasoactive intestinal polypeptide in (abst) 734
secondary hyperparythyroidism in (abst) 733
Renal growth
potassium loading and (abst) 736
Renal inflammatory lesions
diagnostic test for (abst) 711
Renal insufficiency
cerebral and hepatic urea synthesis in (abst) 112
in children, metabolic and nutritional factors 306
in children, somatomedin and growth retardation in 361
and hypercalcemia 194
hyperlipoproteinemia in 142
measurement of growth in children with 378
postpartum 383
Renal vein constriction
effect on immune complex localization (abst) 716
Renal vein thrombosis
anticoagulation for (abst) 658
circulating immune complexes in (abst) 658
Renin
erythropoietin and (abst) 695
chloride-induced effects on (abst) 697
effect of hemorrhage on (abst) 696

Renin (*cont'd*)
furosemide effect on release of, modified by indomethacin (abst) . . . 771
in hypotensive hemorrhage (abst) . . . 696
and prostaglandin excretion (abst) . . . 692
serum chloride and thiazide effect on (abst) . . . 700
release in cortex (abst) . . . 704
in renal artery, effect of PGE_2 and acetylcholine on (abst) . . . 771
in renal hilar lymph (abst) . . . 701
Renin-angiotensin system
continuous ambulatory peritoneal dialysis effect on (abst) . . . 701
converting enzyme inhibition effects on (abst) . . . 696
in glycerol-induced acute renal failure . . . 576
salt and water appetite and (abst) . . . 744
Respiratory failure
and renal function . . . 58
Respiratory infections
nonstreptococcal type, glomerulonephritis in (abst) . . . 663
Retroperitoneal fibrosis
Vesadol® to treat (abst) . . . 204

Salt-wasting nephropathy
renin, aldosterone, and prostaglandin activity in (abst) . . . 650
Saralasin
and nephron filtration rate (abst) . . . 784
Sarcoidosis
renal granulomatous changes in (abst) . . . 544
Schwartzman reaction
glomerular dynamics in (abst) . . . 723
Segmental hypoplasia
as acquired lesion (abst) . . . 645
Serotonin precursor
effect on renal function (abst) . . . 747
Serum sickness nephritis
chemical sympathectomy for (abst) . . . 707
glomerular hemodynamics in (abst) . . . 725
role for monocytes in (abst) . . . 713
Short-bowel syndrome
D-lactic acidosis in (abst) . . . 658
Sodium
excretion, in chronic renal failure, role of aldosterone . . . 228
and natriuretic response (abst) . . . 544
retention during volume expansion in nephrotic syndrome . . . 478
transport
diuretic's action on (abst) . . . 758
inhibition by substance in urine (abst) . . . 782
in ischemia and repair of proximal tubule . . . 31
in toad urinary bladder (abst) . . . 786
Sodium-potassium ATPase
after renal mass reduction (abst) . . . 741
Solutes
changes, in coated charcoal hemoperfusion in uremia . . . 74
Somatomedin
in children with renal insufficiency . . . 361
in renal function (abst) . . . 654
Spontaneously hypertensive rats
enzymatic activity in (abst) . . . 204
natriuretic responses in (abst) . . . 785
Staphylococcal bacteremia
access-device-related, serologic diagnosis of (abst) 667
Steroid therapy
and zinc and growth in rats (abst) . . . 738
Structure-function studies
of rabbit collecting tubule . . . 585
Sympatholytic therapy
intrarenal hemodynamics in (abst) . . . 754
Systemic lupus erythematosus
effect of prolonged corticosteroid therapy . . . 151
immunology of (abst) . . . 715
and normal urinary sediment, in nephritis in young (abst) . . . 667

Tetracyclines
effect on osmotic water flow (abst) . . . 754
Thyroid hormones
effect of hemoperfusion on . . . 74
Ticrynafen
resistance to (abst) . . . 745
Tobramycin
enzyme activity with (abst) . . . 719
Tomography, computerized
to detect complications of percutaneous renal biopsy . . . 87
Transepithelial transport
hormone action in (abst) . . . 764
Transplantation, renal
allograft kidney rupture and repair (abst) . . . 109
bacteriuria and renal function (abst) . . . 789
bilirubinate cholelithiasis in (abst) . . . 791
blood pressure control after (abst) . . . 794
cadaveric donors study (abst) . . . 104
cellular cytotoxicity and, role of methyl-prednisolone in (abst) . . . 107
in children
and dialysis long-term results (abst) . . . 110
growth after (abst) . . . 793
linear growth after (abst) . . . 792
focal segmental sclerosis in (abst) . . . 797
gastrointestinal disturbances
GI morbidity and mortality in (abst) . . . 788
upper GI complications prevented after (abst) . 105
hyperamylasemia and (abst) . . . 790
hyperlipidemia after low-dose steroids for (abst) . 787
and hypertension (abst) . . . 788, 795
human polyoma virus and (abst) . . . 108
immunology studies
complement factors, degradation products, and immune complexes after (abst) . . . 112
immunofluorescent study (abst) . . . 795
immunologic enhancement (abst) . 794, 797, 798 (2)
immunosuppressive therapy after (abst) . . . 799
intrarenal hemodynamics in . . . 1
kidney preservation, cold storage vs. machine perfusion (abst) . . . 787
listeria cerebritis in (abst) . . . 789
long-term (abst) . . . 797
lymphocytes
and lymphocyte function in hemodialysis (abst). 787
mixed lymphocyte culture and (abst) . . . 790

Transplantation, renal (*cont'd*)
membranous nephropathy after (abst) 201
nephron function in 10
ocular findings after (abst) 107
polycythemia and (abst) 796
prediction of outcome (abst) 105
prednisone therapy and (abst) 796
propranolol and warm ischemia for (abst) 797
protein studies
correction of abnormal protein binding or organic acids after (abst) 720
protein clearance and (abst) 792
PTH and phosphate action after (abst) 796
pulmonary and cardiac calcifications after (abst) . 543
rejection
cyclophosphamide and (abst) 793
diagnosis of 790, 792, 794, 796
and dialysis (abst) 793
immunology of (abst) 791, 795, 799
influenza A Victoria and (abst) 793
in HLA-identical recipients 283
intrarenal kinetics (abst) 799
leukopheresis to treat (abst) 788
method to predict and diagnose (abst) 106, 789
prevention (abst) 787, 789
renal swelling and (abst) 791
SEM study of (abst) 107
steroid therapy for (abst) 788, 791
vasomotor nephropathy and (abst) 794
survival data (abst) 795, 798 (2), 799
T cell subsets and (abst) 792
urine cytology after (abst) 790
vascular anomalies in (abst) 110
Triaminopyrimidium
effect on short-circuit current in toad bladder (abst) 757
Triglycerides
in hemodialysis, effect of diet 180
Trimethophan
effect on sodium excretion in caval dogs (abst) . . . 757
Tubules, renal
acidification
effect of lithium on (abst) 748
micropuncture study (abst) 766
acidosis, plasma lysyl oxidase activity in children with (abst) 652
basement membrane of, and cation transport, role in hypotonicity (abst) 768
chloride transport in, in potassium depletion 414
collecting *t.*
stereologic analysis of cells in (abst) 785
structure-function study of 585
distal *t.*
pathophysiologic and clinical spectrum of acidosis of (abst) 645
potassium secretion by (abst) 760
PTH and cAMP effect on calcium-sodium transport in (abst) 638
glucose determination in fluid of, simple method for 191
glutamine in 406
lactate and pyruvate in (abst) 542
and low-mol-wt proteins (abst) 758
proximal *t.*
bicarbonate effects on volume reabsorption in (abst) 764
bicarbonate reabsorption in (abst) 753
cAMP effects on fluid absorption (abst) 752
Tubules, proximal straight
chloride transport in (abst) 779
glycine uptake in (abst) 749
hydraulic conductance of 263
insulin, phlorizin, PTH, phosphate interactin in (abst) 642
ischemic damage and repair in 31
isosmotic volume flow in (abst) 784
membrane transport properties of (abst) 778
passive filtrate reabsorption in (abst) 746
pathogenetic mechanisms in diseases of (abst) . . . 106
perfusion rate, ECV, and urate reabsorption in (abst) 781
sodium effects on (abst) 754, 768
in transplantation failure 10
Tyrosine
metabolism in uremia vs. normal 169

Ulcers, peptic
and chronic renal failure (abst) 293
Ultradiffusion
cause of inadequate hemodynamics during (abst) . 109
Ultrafiltration
and high sodium dialysis (abst) 108
prevention of arterial hypoxemia by (abst) 678
sorbent regeneration of, in hemofiltration (abst) . . 544
sterile pyrogen-free electrolyte solution by 522
Urate
transport by cortical brush border membrane vesicles (abst) 751
Urea
effect on papillary epithelial transmembrane PD (abst) 783
Uremia
albumin synthesis in (abst) 726
altered taste perception as measure of (abst) 651
autonomic dysfunction in (abst) 731
bleeding in, vascular factors (abst) 110
body burden of uremic toxins in (abst) 726
cell metabolism in (abst) 743
cellular injury corrected by diet (abst) 673
in children, amino acid and protein metabolism . . 340
duodenal mucosa in, effect of vit. D_3 (abst) 652
glucose reabsorption in, effects of NaCl diet on (abst) 732
glycoprotein abnormalities in (abst) 663
hemolysis and, role of peroxidation (abst) 107
hypercalcemia during treatment of (abst) 667
intestinal absorption of zinc in hemodialysis for (abst) 669
intestinal transport of glucose and amino acids in (abst) 729
nitrogen balance during intermittent dialysis therapy of 491
peroxidative hemolysis in (abst) 727
phenols as toxins in (abst) 292
phenylalanine metabolism and 169
phosphorus-calcium-PTH function in 207

Uremia (*cont'd*)
and polyneuropathy (abst) 108
potassium and (abst) 724
and prostacyclin in blood vessels (abst) 107
protein diet effect on (abst) 204
red blood cell activity in (abst) 781
remnant kidney in (abst) 730
Uremic pericarditis
indomethacin therapy for (abst) 664
pericardiostomy and (abst) 202
Uremic pruritus
ultraviolet phototherapy of (abst) 652
Ureteral ligation, unilateral
renal denervation and (abst) 735
Ureteral occlusion
renal changes with (abst) 724
Urinary acidification
bicarbonate-free perfused kidney and (abst) 769
effect of calcium on (abst) 748
and hydrogen ion gradient (abst) 783
Urine
backflow into renal pelvis (abst) 775
concentrating defect, in aged rat (abst) 750
excretion, effect of antihistamine and antiserotonine on (abst) 752
fibrin degradation products, in glomerulonephritis, urinary tract infections, and renal transplants (abst) 111
osmolality, in normals without fluid deprivation (abst) 768
sodium, vs. age, in essential hypertension 619
Urinary tract infections
antibody-coated bacteria in 607
immunofluorescent method to detect (abst) 201
Urolithiasis
environmental and genetic factors in (abst) 647

Varicella
glomerulonephritis and renal failure induced by (abst) 720
Vasodilators
effect on glomerular filtration (abst) 772
Vasopressin
age-related response of (abst) 660
during hemorrhagic hypertension (abst) 693
effect on cAMP-protein kinase (abst) 779
and structure changes in collecting duct membrane (abst) 762
Vitamin B_{12}
uptake in kidney, as extracellular reference marker (abst) 781
Vitamin D
deficiency, cortical alkaline phosphatase activity in (abst) 643
metabolites, role in resistance to PTH in renal failure 245
in phosphate depletion (abst) 636
Vitamin D_3
and hypophosphatemic rickets (abst) 637
in normal adult rats (abst) 640
in osteodystrophy (abst) 637
role in calcium and phosphate transport (abst) . . . 639
synthesis in kidney (abst) 636
Volume depletion
in anephric man (abst) 723
Volume expansion
in acute renal failure model 115
sodium retention during, in nephrotic syndrome . . 478

Water excretion
in high output cardiac failure (abst) 761
Wegener's granulomatosis
nephritis of (abst) 706

X-ray contrast media
and renal injury (abst) 665
D-Xylose
in renal failure (abst) 648

KIDNEY INTERNATIONAL

Official Journal of the International Society of Nephrology

Le Journal de la Société Internationale de Néphrologie

LABORATORY INVESTIGATION

Intrarenal hemodynamics in the transplanted rat kidney. *Bo Johan Norlén, Anders Engberg, Örjan Kallskog, and Mats Wolgast* 1

Nephron function of the transplanted rat kidney. *Bo Johan Norlén, Anders Engberg, Örjan Kallskog, and Mats Wolgast* 10

Isolation and characterization of rat glomerular epithelial cells in vitro. *Jeffrey I. Kreisberg, Richard L. Hoover, and Morris J. Karnovsky* 21

Ischemic damage and repair in the rat proximal tubule: Differences among the S_1, S_2, and S_3 segments. *Manjeri A. Venkatachalam, David B. Bernard, John F. Donohoe, and Norman G. Levinsky* 31

Relation of ammonia excretion adaptation to glutaminase activity in acidotic, subtotalnephrectomized rats. *Siribhinya Benyajati and Leon Goldstein* 50

Renal function and intrarenal hemodynamics in acutely hypoxic and hypercapnic rats. *Brigitt Zillig, Georg Schuler, and Bruno Truniger* 58

CLINICAL INVESTIGATION

Hemodialysis bone disease: Correlation between clinical, histological, and other findings. *Fernando Alvarez-Ude, Terry G. Feest, Michael K. Ward, Alkis M. Pierides, Hewett A. Ellis, Kathleen M. Peart, William Simpson, Doris Weightman, and David N. S. Kerr* 68

Solute, amino acid, and hormone changes with coated charcoal hemoperfusion in uremia. *James F. Winchester, John G. Ratcliffe, Eric Carlyle, and Arthur C. Kennedy* 74

TECHNICAL NOTE

Experimental chronic renal failure in the rat by electrocoagulation of the renal cortex. *Jane Boudet, N. K. Man, Peter Pils, André Sausse, and Jean-Louis Funck-Brentano* 82

Use of computerized tomography to diagnose complications of percutaneous renal biopsy. *Robert Rosenbaum, Phillip E. Hoffsten, Robert J. Stanley, and Saulo Klahr* 87

NEPHROLOGY FORUM

Refractory ascites in cirrhosis. *Norman G. Levinsky* 93

ABSTRACTS

European Dialysis and Transplant Association. June 4–7, 1978 103

ANNOUNCEMENTS 113

KIDNEY INTERNATIONAL

Volume 14, Number 2, August 1978

LABORATORY INVESTIGATION

Pathogenic mechanisms in early norepinephrine-induced acute renal failure: Functional and histological correlates of protection. *Robert E. Cronin, Antoine de Torrente, Paul D. Miller, Ruth Ellen Bulger, Thomas J. Burke, and Robert W. Schrier* 115

Manufacture and utilization of antimony pH electrodes. *Carlton R. Caflisch, Leo R. Pucacco, and Norman W. Carter* 126

Hyperlipoproteinemia in experimental chronic renal insufficiency in the rat. *C. C. Heuck, M. Liersch, E. Ritz, K. Stegmeier, A. Wirth, and O. Mehls* 142

Prolonged lifespan and high incidence of neoplasms in NZB/NZW mice treated with hydrocortisone sodium succinate. *Sara E. Walker, Miriam R. Anver, Stephen L. Schechter, and Giles G. Bole* ... 151

Phlorizin stimulation of p-aminohippurate uptake in rat kidney cortex slices. *Richard P. Wedeen and Bhagirath T. Vyas* 158

CLINICAL INVESTIGATION

Phenylalanine metabolism in uremic and normal man. *Michael R. Jones, Joel D. Kopple, and Marian E. Swendseid* 169

Response of plasma triglycerides to dietary change in patients on hemodialysis. *Mary L. Sanfelippo, Robert S. Swenson, and Gerald M. Reaven* 180

TECHNICAL NOTES

Norepinephrine-induced acute renal failure: A reversible ischemic model of acute renal failure. *Robert E. Cronin, Abby M. Erickson, Antoine de Torrente, Keith M. McDonald, and Robert W. Schrier* 187

A simple fluorometric method for glucose determination in nanoliter samples. *Robert W. Stoll and Sung-Feng Wen* 191

NEPHROLOGY FORUM

Renal insufficiency and hypercalcemia. *Samuel O. Thier* 194

ABSTRACTS

French Society of Nephrology, February 4, 1978 201

ANNOUNCEMENTS 205

KIDNEY INTERNATIONAL

Volume 14, Number 3, September 1978

Official Journal of the International Society of Nephrology

LABORATORY INVESTIGATION

Interrelations between phosphorus, calcium, parathyroid hormone, and renal phosphate excretion in response to an oral phosphorus load in normal and uremic dogs. *Michael A. Kaplan, Janet M. Canterbury, George Gavellas, David Jaffe, Jacques J. Bourgoignie, Eric Reiss, and Neal S. Bricker* 207

Bicarbonaturic effect of lysine in the dog. *André Gougoux, Guy Lemieux, and Patrick Vinay* . . . 215

Role of aldosterone in the control of sodium excretion in patients with advanced chronic renal failure. *Tomas Berl, Fred H. Katz, William L. Henrich, Antoine de Torrente, and Robert W. Schrier* 228

Renal handling of phosphate *in vivo* and *in vitro* by the X-linked hypophosphatemic male mouse: Evidence for a defect in the brush border membrane. *Harriet S. Tenenhouse, Charles R. Scriver, Roderick R. McInnes, and Francis H. Glorieux* 236

Resistance to parathyroid hormone in renal failure: Role of vitamin D metabolites. *Peter J. Somerville and Michael Kaye* 245

Luminal volume and reabsorption in the loop of Henle: Effects of blood pressure and noradrenalin. *Andrew D. Baines* 255

Perfusion rate-dependence of transepithelial osmosis in isolated proximal convoluted tubules: Estimation of the hydraulic conductance. *Thomas E. Andreoli, James A. Schafer, and Susan L. Troutman* 263

Experimental dialysis disequilibrium syndrome: Prevention with glycerol. *Allen I. Arieff, Virginia C. Lazarowitz, and Raul Guisado* 270

TECHNICAL NOTE

Preservation of renal brush border membrane transport function by storage in glycerol. *Shirley A. Hilden and Bertram Sacktor* 279

NEPHROLOGY FORUM

Transplant rejection in HLA-identical recipients. *Charles B. Carpenter* 283

ABSTRACTS

Renal Association, October 1977 and February 1978 292

Israel Society of Nephrology, January 1978 295

SYMPOSIUM ON METABOLISM AND GROWTH IN CHILDREN WITH KIDNEY DISEASE

Introduction. *Malcolm A. Holliday, Cyril Chantler, and Donald E. Potter* 299

Energy balance and growth: Experience in treating children with malnutrition. *Ann Ashworth* . . . 301

Metabolic and nutritional factors in children with renal insufficiency. *Malcolm A. Holliday and Cyril Chantler* 306

Energy and protein intakes as determinants of nitrogen balance. *Hamish N. Munro* 313

Insulin and growth hormone: Regulators of growth with particular reference to muscle. *Donald B. Cheek and Joan E. Graystone* 317

Effect of essential amino acid supplementation on muscle and plasma free amino acids in chronic uremia. *Anders Alvestrand, Jonas Bergström, Peter Fürst Guna Germanis, and Ulla Widstam* . . . 323

Mechanisms of glucocorticoid inhibition of growth. *John D. Baxter* 330

Statural growth of children with renal disease. *Donald E. Potter and Ira Greifer* 334

Abnormal amino acid and protein metabolism in uremia. *Joel D. Kopple* 340

Acidosis and growth in nonuremic renal disease. *Elisabeth McSherry* 349

Childhood renal osteodystrophy. *Louis V. Avioli* 355

Somatomedin and growth retardation in children with chronic renal insufficiency. *John E. Lewy and Judson J. VanWyk* 361

Growth and glucocorticoids in children with kidney disease. *L. B. Travis, R. Chesney, P. McEnery, D. Moel, A. Pennisi, D. Potter, Y. B. Talwalkar, and E. Wolff.* 365

Growth assessment in abnormal children. *Alex F. Roche* 369

Measurement of growth in children with renal insufficiency. *Donald E. Potter, Michel Broyer, Cyril Chantler, Alan Gruskin, Malcolm A. Holliday, Alex Roche, Karl Schärer, and David Thissen* 378

NEPHROLOGY FORUM

Postpartum renal insufficiency. *Thomas F. Ferris* 383

ANNOUNCEMENTS 393

KIDNEY INTERNATIONAL

Volume 14, Number 5, November 1978

Official Journal of the International Society of Nephrology
Le Journal de la Société Internationale de Néphrologie

EDITORIAL REVIEW

Carbon dioxide equilibria in the kidney: The problems of elevated carbon dioxide tension, delayed dehydration, and disequilibrium pH. *Thomas H. Maren* 395

LABORATORY INVESTIGATION

Localization of glutamine accumulation and tubular reabsorption in rat nephron. *Helen B. Burch, Arthur W. K. Chan, T. Randall Alvey, and Oliver H. Lowry* 406

Effects of potassium depletion on renal tubular chloride transport in the rat. *Robert G. Luke, Fred S. Wright, Nicole Fowler, Michael Kashgarian, and Gerhard H. Giebisch* 414

Comparison between the electrical potential profile and the chloride gradients in the thin limbs of Henle's loop in rats. *Ronald J. Hogg and Juha P. Kokko* 428

Estimation of relative glomerular capillary surface area in normal and hypertrophic rat kidneys. *David W. Knutson, Frank Chieu, Cleaves M. Bennett, and Richard J. Glassock* 437

Cyclic nucleotide phosphodiesterases in glomeruli of rat renal cortex. *Vicente E. Torres, Yvonne S. F. Hui, Sudhir V. Shah, Thomas E. Northrup, and Thomas P. Dousa* 444

Some hemodynamic determinants of immune complex trapping by the kidney. *Lee A. Hebert, Carin L. Allhiser, and Susan M. Koethe* 452

Mechanism of the metabolic acidosis of selective mineralocorticoid deficiency. *Phillip J. DiTella, Brijnandin Sodhi, James McCreary, Jose A. L. Arruda, and Neil A. Kurtzman* 466

Renal sodium retention during volume expansion in experimental nephrotic syndrome. *David B. Bernard, Edward A. Alexander, William G. Couser, and Norman G. Levinsky* 478

CLINICAL INVESTIGATION

Influence of exchange volume and dialysate flow rate on solute clearance in peritoneal dialysis. *M. Robson, D. G. Oreopoulos, S. Izatt, R. Ogilvie, A. Rapoport, and G. A. deVeber* 486

Nitrogen balance during intermittent dialysis therapy of uremia. *Michael F. Borah, Patricia Y. Schoenfeld, Frank A. Gotch, John A. Sargent, Marsha Wolfson, and Michael H. Humphreys* 491

Evidence for an autologous immune complex pathogenic mechanism in acute poststreptococcal glomerulonephritis. *Rawle M. McIntosh, Rafael García, Lírimo Rubio, Dana Rabideau, James E. Allen, Ronald I. Carr, and Bernardo Rodríguez-Iturbe* 501

Nonprogressive, histologically mild membranous glomerulonephritis appearing in all evolutionary phases as histologically "early" membranous glomerulonephritis. *Tom Törnroth, Gustav Tallqvist, Amos Pasternack, and Ewert Linder* 511

TECHNICAL NOTE

Successful production of sterile pyrogen-free electrolyte solution by ultrafiltration. *Lee W. Henderson and Erminia Beans* 522

Kinetics of glomerular visceral epithelial cell phagocytosis. *Zeev Sharon, Melvin M. Schwartz, Bendicht U. Pauli, and Edmund J. Lewis* 526

NEPHROLOGY FORUM

Nephrotic syndrome complicating connective tissue disease. *Richard J. Glassock* 530

ABSTRACTS

French Society of Nephrology, May 8, 1978 541

ANNOUNCEMENTS 544

KIDNEY INTERNATIONAL

EDITORIAL

Isolated membrane vesicles in the evaluation of the nature, localization, and regulation of renal transport processes. *Rolf Kinne and Irving L. Schwartz* 547

LABORATORY INVESTIGATION

Contraction alkalosis in the awake rat: Study of its generation and 24-hour follow-up. *François Lecompte, Monique Brun, and Michel Paillard* 557

Lactate and pyruvate metabolism in isolated renal tubules of normal dogs. *Gabriel Baverel, Maurice Bonnard, Edith d'Armagnac de Castanet, and Michel Pellet* 567

Intrarenal renin and angiotensins in glycerol-induced acute renal failure. *Robert L. Baranowski, Christof Westenfelder, and Neil A. Kurtzman* 576

Structural-functional heterogeneity along the rabbit collecting tubule. *John B. Stokes, C. Craig Tisher, and Juha P. Kokko* 585

CLINICAL INVESTIGATION

Radioimmunologic method for detection of antitubular basement membrane antibodies. *Philippe P. Graindorge and Philippe R. Mahieu* 594

Antibody-coated bacteria in persistent and recurrent urinary tract infections. *Virginia L. Thomas, Marvin Forland, Dana LeStourgeon, and Alexis Shelokov* 607

Antibody responses to influenza vaccination in patients with chronic renal failure. *E. O. Osanloo, B. S. Berlin, S. Popli, T. S. Ing, J. E. Cummings, V. C. Gandhi, W. P. Geis, and J. E. Hano* 614

Age versus urinary sodium for judging renin, aldosterone, and catecholamine levels: Studies in normal subjects and patients with essential hypertension. *Peter Weidmann, Carlo Beretta-Piccoli, Walter H. Ziegler, Gerald Keusch, and Zeev Glück* 619

ANNOUNCEMENTS 629

Volumes 13 and 14 (6 issues per volume) will be published in 1978. Published monthly. Subscription price for 1978: $130.00 including postage. Subscription to the journal is included in the membership dues of the International Society of Nephrology. Special rates are available for individual subscriptions for personal use only. All orders must be accompanied by payment. Prices of back-volumes 1-12 are available on request. Correspondence concerning subscriptions should be addressed to the publisher.

It is a fundamental condition that submitted manuscripts have not been published and will not be simultaneously submitted elsewhere. By submitting a manuscript the authors agree that the copyright for their article is transferred to the International Society of Nephrology if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature, and translations. Copyright is not claimed for material prepared by an officer or employee of the United States Government as a part of that person's official duties.

The Article-Fee Code on the first page of an article in this journal indicates the copyright owner's consent that copies may be made for personal or internal use, provided the stated fee for copying beyond that permitted by Section 107 and 108 of the United States Copyright Law is paid through the Copyright Clearance Center, Inc.

If a code does not appear, copies of the article beyond that permitted by Section 107 or 108 of the United States Copyright Law may be made without charge provided permission is obtained from the publisher.

The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

The use in this journal of registered trade names, trademarks, etc. without special acknowledgment does not imply that such names, as defined by the relevant protection laws, may be regarded as unprotected and thus free for general use.
